

WHAT IS THE FUND'S OBJECTIVE?

Global Opportunities Equity seeks to give investors access to some of the best fund managers across the globe. Our intent is to outperform its benchmark over any five year period.

WHAT DOES THE FUND INVEST IN?

Global Opportunities Equity is a multi-manager fund which invests in a limited number of strategies (funds and segregated mandates) managed by top-quality managers that mainly have exposure to shares in developed markets. It is also mandated to include some exposure to emerging markets.

Typically, six to ten strategies are included. Each strategy is selected based on its long-term track record of outperforming the market, its investment philosophy and the quality of its fund managers.

The fund is mandated to use derivative instruments for efficient portfolio management purposes.

IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

Global Opportunities Equity invests in equity funds that mostly cover developed markets, including the US, Europe and Japan.

The fund is well-diversified; it has exposure to a range of different countries, industries and fund manager styles. The fund managers included in the fund are well-established and have been rigorously researched and vetted.

While we have a disciplined approach to carefully balance the risks across the different funds, shares can be volatile investments and there is a meaningful risk of capital loss over the short term. Global currency movements may intensify investment gains or declines.

HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The fund is managed to deliver the best possible returns over the long term; an investment horizon of 10 years or more is therefore ideal. It is not suitable as a single investment for investors who need to preserve their capital over five years or less.

WHO SHOULD CONSIDER INVESTING IN THE FUND?

Investors who are building wealth, and who

- ▶ want exposure to some of the world's top equity funds as part of a diversified investment portfolio;
- ▶ accept that the fund may underperform the market significantly in the short term in pursuit of superior long-term gains;
- ▶ are overexposed to South Africa and require an international investment;
- ▶ do not require an income from their investment.

WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of 0.85% is payable.

All fees exclude VAT. Fund expenses incurred in the fund include fees payable to unconnected international fund managers on a portion of assets situated offshore as well as trading, custody and audit charges. All performance information is disclosed after deducting all fees and other fund costs.

We do not charge fees to access or withdraw from the fund.

More detail is available on www.coronation.com.

Performance and fund positioning

The Fund declined 1.9% for the quarter (Q2-24) compared to the benchmark return of 2.9%, bringing the rolling 12-month performance to 11.9% against the 19.4% returned by the MSCI All Country World Index (ACWI).

In general, the economic momentum of the first quarter continued into the second, and investors had to reassess the outlook for rate cuts, which moved further out. Artificial Intelligence (AI) once again dominated the markets, and a strong earnings season for tech companies meant that US growth stocks had strong gains over the quarter. In China, government moves to support the real estate sector provided a boost for equities which, together with the AI-exposed Taiwanese market, helped Asia ex-Japan give rise to strong gains in the region. In Europe, returns were hampered by the snap election in France, which surprised the markets and caused French equities to fall, overshadowing a rate cut announcement by the ECB.

North America was the best-performing region in Q2-24, advancing 3.8% (in US dollar terms). Japan's return was the weakest, declining -4.2% (in US dollar terms). Europe rose 0.9%, and the Pacific ex-Japan advanced 2.5% (both in US dollar terms). Emerging markets outperformed developed markets, advancing 5% compared to 3% (both in US dollar terms).

Amongst the global sectors, IT (+11.2%), telecommunications (+7.7%) and utilities (+2.2%) were the best-performing sectors for the quarter. The worst-performing sectors were materials (-4.0%), consumer discretionary (-2.7%) and industrials (-2.6%).

It was a difficult quarter for all the underlying managers with all of them underperforming the index (ACWI).

Contrarius Global Equity and Eminence Long Fund were the two big detractors for the quarter, but Tremblant Global Growth, SEG Crosby Street, Coronation Equity Select and Egerton Capital also had negative returns for the period. While Lone Monterey and Coronation Global Emerging Markets produced positive returns, both still lagged behind the benchmark (ACWI).

Contrarius had a difficult quarter, declining 6.6%, thereby extending their recent run of underperformance. The most damage originated from the communication services, consumer discretionary and financial sectors. Positions in Warner Brothers Discovery (-14.9%) and Qurate Retail (-48.8%) were the key underperformers but Block Inc. (-23.8%), Baidu (-17.9%), Just Eat (-18.8%) and Paramount (-11.3%) also contributed. Amongst all the negatives, Tesla (+12.6%) rebounded from its recent lows while Fox Corp. (+11.9%) and Sea Ltd (+33.0%) also made a positive contribution, amongst others.

Eminence returned -4.7% for the period. Consumer discretionary and healthcare stocks caused the bulk of the underperformance with names such as Verano Holdings (-39.5%), Dave & Buster's Entertainment (-36.4%), Entain (-20.9%) and Green Thumb Industries (-17.7%) being the key negative contributors. The smaller position in food delivery companies Just Eat (-18.8%) and Delivery Hero (-17.0%) also detracted. Eminence also owns Sea Ltd (+33.0%) with other positive performers

including Schibsted (+16.3%) and Amazon (+7.1%) helping to limit the downside.

After a strong run of performance, Egerton retreated this quarter with the industrials, materials and consumer staples stocks causing a decline of 1.4%. Airbus (-24.0%), GE Healthcare Technology (-14.3%), Ryanair (-22.9%) and Canadian Pacific Kansas City (-10.6%) were examples of this. Positions in Alphabet (+20.6%), Amazon (+7.1%) and Microsoft (+6.4%) did well to offset some of the underperformance.

Consumer discretionary stocks accounted for all of Tremblant's underperformance as it trailed the index by 4.2% for the quarter. Five Below (-39.9%), Yum China (-22.2%), DoorDash (-21.0%) and DraftKings (-15.9%) were examples of this.

Select Equity Group's Crosby Street returned -1.7% after its healthcare, financials and materials stocks dragged it behind the benchmark. Examples of detractors include Edenred (-18.9%), CRH (-12.7%), Sartorius Stedim Biotech (-42.2%) and CDW (-12.3%). TSMC (+28.2%) was the bright spot amongst the gainers.

Outlook

At the start of 2024 expectations were that inflation would return to near-normal and allow central banks to cut rates and accelerate global growth. However, six months on, while growth has been satisfactory, inflation has proved sticky, and rates remain firmly elevated. Looking ahead, global growth should remain as is although change geographically. The US is showing some signs of moderation, and a soft landing is possible even if fairly rare. At the same time, growth is picking up in Europe as the cost-of-living shock fades and the region moves into a more favourable growth environment. Solid labour markets and rising real wages should continue to support consumption while the slow deployment of the Recovery Fund investments should also contribute to this rebound. In Asia, China is still struggling with its real estate market and a slump in consumption, but activity is improving elsewhere within emerging markets. Equity markets have benefited from the excitement around AI but on a very narrow basis, meaning that there is potential for continued gains as the broader market recovers especially if there is scope to eventually cut rates later this year or early 2025.

IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION GLOBAL OPPORTUNITIES EQUITY FUND OF FUNDS

The Global Opportunities Equity Fund of Funds should be considered a long-term investment. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. The top holdings are not reflected on a look-through basis. The fund is mandated to invest up to 100% of its portfolio into foreign securities and may as a result be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in the South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. A fund of funds invests in collective investment schemes that levy their own fees and charges, which could result in a higher fee structure for this fund. Coronation reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Coronation Global Fund Managers (Ireland) Limited is authorised in Ireland and regulated by the Central Bank of Ireland. The fund is approved under Section 65 of the Collective Investment Schemes Control Act by the Financial Sector Conduct Authority of South Africa. Portfolio managed by Coronation International Limited, a firm authorised and regulated by the Financial Conduct Authority.

JP Morgan (Ireland) has been appointed as the fund's trustees (www.jpmorgan.com; t: +353-1-612-4000), and its custodian is JP Morgan Administration Services (Ireland) Limited (www.jpmorgan.com; t: +353-1-612-4000). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

HOW ARE UNITS PRICED AND AT WHAT PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every business day. Fund valuations take place at approximately 17h00 each business day (Irish Time) and forward pricing is used. Instructions must reach Coronation before 12h00 (SA Time) to ensure the value of the same business day. You can expect to receive withdrawal payouts three to four business days after the dealing day. Large investments or redemptions (exceeding 5% of fund value) may be subject to an anti-dilution levy to defray dealing costs and expenses. This levy, where applicable, is applied fully for the benefit of the fund.

HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using Class A NAV prices with income distributions reinvested. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio over the period referenced. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the underlying fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1 year TER is for the 12 months to end of the previous financial year (updated annually). The 3 year TER is for a rolling 36-month period to the last available quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on www.coronation.com. You will also find additional information on the considerations pertinent to investing in a fund denominated in a foreign currency and domiciled in an offshore jurisdiction.
