

## WHAT IS THE FUND'S OBJECTIVE?

Global Equity Select aims to give investors access to the best opportunities in global equity markets. The fund is biased to developed markets and actively seeks out attractively valued shares to maximise long-term growth. Our intent is to outperform the global equity benchmark over all periods of five years and longer.

## WHAT DOES THE FUND INVEST IN?

The fund invests in the shares of companies listed on equity markets around the world. The fund has a bias towards developed markets, typically holding at least 70% in developed market shares and up to 30% invested in shares listed in emerging markets. While our intent is to remain fully invested in shares, the fund is allowed to hold up to 20% of its portfolio in cash and bonds.

## IMPORTANT PORTFOLIO CHARACTERISTICS AND RISKS

Global Equity Select will only invest in shares we view as being attractively valued relative to other shares which may offer superior long-term investment growth.

The fund's share selection is the result of rigorous international research conducted by Coronation's investment team.

While we have a disciplined approach to reducing risk, shares can be volatile investments and there is a meaningful risk of capital loss over the short term. Global currency movements may intensify investment gains or declines.

## HOW LONG SHOULD INVESTORS REMAIN INVESTED?

The fund is managed to deliver the best possible returns over the long term; an investment horizon of 10 years or more is therefore ideal. It is not suitable as a single investment for investors who need to preserve their capital over five years or less.

## WHO SHOULD CONSIDER INVESTING IN THE FUND?

Investors who are building wealth, and who

- ▶ are comfortable with full exposure to shares listed in global markets outside South Africa;
- ▶ accept that the fund may underperform the market significantly in the short term in pursuit of superior long-term gains;
- ▶ hold other investments and are looking to add exposure to global equity markets;
- ▶ do not require an income from their investment.

## WHAT COSTS CAN I EXPECT TO PAY?

An annual fee of 1.25% is payable.

Fund expenses that are incurred in the fund include administrative, trading, custody and audit charges. All performance information is disclosed after deducting all fees and other portfolio costs. We do not charge any fees to access or withdraw from the fund.

More detail is available on [www.coronation.com](http://www.coronation.com).

### Performance and fund positioning

Global equity markets had a strong third quarter, with the MSCI All Country World Index returning 7%. Key factors in the quarter included a 50 basis points (bps) rate cut by the US Federal Reserve in September, Chinese stimulus, and a broadening of equity performance beyond the largest stocks. While the Magnificent 7 group of large capitalisation technology shares accounted for the majority of S&P 500 Index returns in the first half of 2024, we saw a reversal of this trend in the third quarter. Following the unprecedented levels of market narrowness that we wrote about in prior commentaries, returns broadened out significantly in the third quarter, with 65% of stocks outperforming the Index, and the rest of the S&P 500 Index's gain of 8% trouncing the advance of the Magnificent 7, which returned only 2% in the quarter per Morgan Stanley analysis. The Fund had a good quarter, increasing by 10.1%.

Performance was broad-based with notable contributions from many stocks which were previously discussed such as Auto1, Entain, Rolls Royce and our food delivery holdings Delivery Hero and Just Eat Takeaway.

We discussed our position in Smartsheet in our March 2024 quarterly commentary. After an indiscriminate sell-off pertaining to Smartsheet's conservative FY25 guidance, we took the opportunity to add to our position when the stock fell to \$38 in March. Smartsheet's subsequent June and September results were strong while peers delivered lacklustre growth, validating our belief in its undervalued status relative to the software peer group. Historically we've observed that mid-cap software companies, with an enterprise-grade product, high revenue growth, and strong free cash flow conversion, often become attractive targets for private equity players. We benefited from this in previous holdings Coupa and New Relic, which were both taken private. While not a primary driver of our investment in Smartsheet, the possibility of being acquired was always considered potential upside optionality. On 24 September, Vista and Blackstone partnered to acquire Smartsheet at \$56.40, a 41% premium to the three-month average closing price, and we subsequently exited our position.

A detractor during the quarter was Ryanair, Europe's largest airline for short haul travel. In July, the share price came under pressure when the company released Q1 results which showed that airfares were down approximately 15%. However, this does not change our view on the long-term earnings power of the business and gave us an opportunity to add to our position. We believe industry dynamics are favourable: The industry has consolidated meaningfully over the years and continues to do so. Secondly, demand remains strong while industry supply is under pressure due to delays in the deliveries of new planes, as well as engine issues at some of Ryanair's competitors, resulting in many aircraft being grounded – both of these issues will take years to resolve. Ryanair is well positioned with extremely low operating costs and aircraft orders that locked in favourable prices, giving them lower aircraft ownership costs than peers. In addition, Ryanair has a very strong balance sheet. The company has about 8% of its market cap in net cash and owns essentially all their aircraft – vastly different to many peers that have large lease liabilities. This not only puts the company in a very strong competitive position, but it also allows Ryanair to return a meaningful amount of cash to shareholders – the combination of dividends and buybacks puts Ryanair on a yield of approximately 10% this year.

### Outlook

The team continues to find many compelling bottom-up stock ideas, often in lesser-known names, some of which are mentioned above and others. We thus remain very optimistic about the outlook for our portfolio of companies and the positioning of the portfolio.

Thank you for your support and interest in the Fund.

### IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION GLOBAL EQUITY SELECT FUND

The Global Equity Select Fund should be considered a long-term investment. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. The top 10 holdings are reflected on a look-through basis. The fund is mandated to invest up to 100% of its portfolio into foreign securities and may as a result be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in the South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Coronation reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Coronation Global Fund Managers (Ireland) Limited is authorised in Ireland and regulated by the Central Bank of Ireland. The fund is approved under Section 65 of the Collective Investment Schemes Control Act by the Financial Services Board of South Africa. Portfolio managed by Coronation Investment Management International (Pty) Ltd (FSP45646), an authorised financial services provider.

JP Morgan Bank (Ireland) has been appointed as the fund's trustees ([www.jpmorgan.com](http://www.jpmorgan.com); t: +353-1-612-4000), and its custodian is JP Morgan Administration Services (Ireland) Limited ([www.jpmorgan.com](http://www.jpmorgan.com); t: +353-1-612-4000). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

### HOW ARE UNITS PRICED AND AT WHAT PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every business day. Fund valuations take place at approximately 17h00 each business day (Irish Time) and forward pricing is used. Instructions must reach Coronation before 12h00 (SA Time) to ensure the value of the same business day. You can expect to receive withdrawal payouts three to four business days after the dealing day. Large investments or redemptions (exceeding 5% of fund value) may be subject to an anti-dilution levy to defray dealing costs and expenses. This levy, where applicable, is applied fully for the benefit of the fund.

### HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using Class A NAV prices with income distributions reinvested. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

### WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio over the period referenced. The TER charged by any underlying fund held as part of a fund's portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the underlying fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. The 1 year TER is for the 12 months to end of the previous financial year (updated annually). The 3 year TER is for a rolling 36-month period to the last available quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

### ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

### WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on [www.coronation.com](http://www.coronation.com). You will also find additional information on the considerations pertinent to investing in a fund denominated in a foreign currency and domiciled in an offshore jurisdiction.
